Guardian add-on

Safeguard business data and streamline your organization's secured access

Add Guardian to your monday.com account to enhance data protection and governance, streamline organization-wide access, and adhere to compliance requirements with an extra layer of protection.

| Tenant-level encryption (TLE)	Bring Your Own Key (BYOK)	Multiple SSOs	Data Leak Prevention (DLP)

Meet your company's security policies with advanced data protection and granular control

Tenant-level encryption (TLE)

Segregate and safeguard your data with a dedicated encryption key for your account, further isolating any sensitive data from unauthorized access.
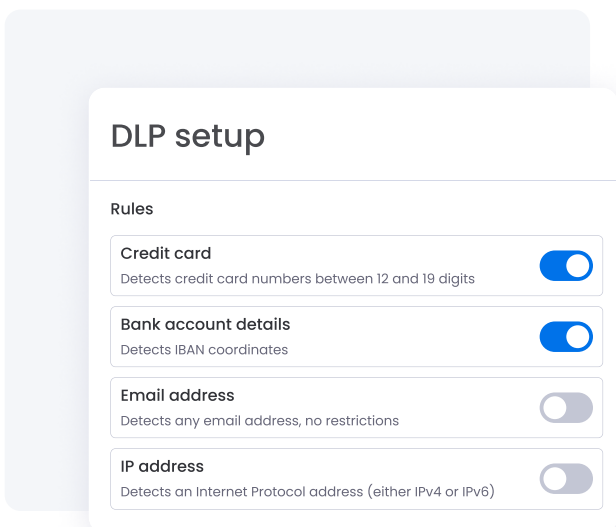

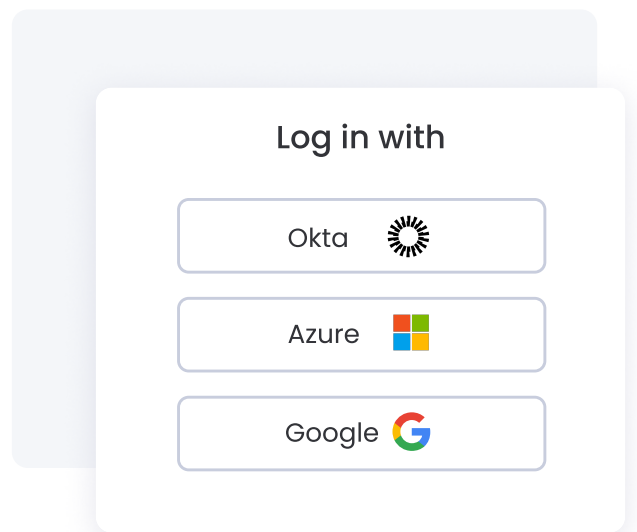

✳✳✳✳

Bring Your Own Key (BYOK)

Gain full control over your data by bringing your own encryption key. Manage your key's lifecycle, grant and revoke access at any point, and maintain total data governance and privacy.

Multiple SSOs

Implement multiple SSO vendors seamlessly to simplify secured access to monday.com across the organization.
